

# Nicolas Sandron

## Product Engineer

With over a decade of experience in the media industry, I've developed a deep expertise as a fullstack developer, driven by a passion for leveraging technology to engineer successful products. My journey through diverse roles has equipped me with a strong understanding of both the technical and strategic aspects of product development.

I strive to collaborate on projects that positively impact society.

## Expertise

### Languages & Frameworks

Typescript | React | Next.js | Ionic

Firebase | Tailwind | Node.js

GraphQL | Neo4J | Docker

A ridiculous amount of npm packages

### Dev & Analytics

Git | Docker | AWS | GTM

### Design & Illustrations

Photoshop | Illustrator | Figma

### Management

Scrum | Agile | Jira | Linear

## Language

French - Native

English - C2

Spanish - C1

Portuguese - B2

Dutch - B2

## A life of work

### 2023 - Present

#### Fullstack developer @Majelan ETX

- Collaborating with cross-functional teams to architect and implement robust solutions.
- Engineering intuitive and high-performance user interfaces using Next.js and React.
- Driving project success with expertise in front-end development methodologies.
- Ensuring adherence to best practices in coding standards, performance, and scalability.

Next.js - React - Firebase - Go - Figma - Docker - Vercel - GitHub Actions - Playwright

### 2021 - 2023

#### Product developer @SweetPotato

- Built two hybrid apps from scratch: one for facilitating fund collection for charities, and another for guest management at camps.
- Focused on personal ventures and innovative solutions.

Ionic - React - Firebase - Node.js - Python - Docker - GraphQL - GH Actions - Cypress

### 2019 - 2021

#### Product Owner @Beelance

- Enhanced communication between stakeholders and the product team using technical skills.
- Introduced Behavior Driven Development (BDD) to improve development and testing processes.
- Led the team in an Agile environment using Scrum methodologies.

Agile - Scrum - Clubhouse - Jira - Gherkin

### 2018 - 2019

#### Software Engineer @Beelance

- Contributed to technical decisions and implementations for a web platform serving freelancers.
- Utilized React for frontend, Node.js for backend, and GraphQL for data queries.
- Transitioned to a Product Owner role to focus on the product from a business perspective.

React - Node.js - Python - GraphQL - Docker - Neo4j - GitLab - Jest - Cypress

### 2012 - 2014

#### Software Engineer @IgnitionOne

- Developed an internal tool to automate the creation and optimization of pop-ups.
- Migrated the platform from AngularJs and Node.js to React and Java.
- Focused on frontend challenges in a fullstack role within an Agile team.

AngularJs - React - Node.js - MongoDB - GitLab - Jest
