### Dev & Analytics

Git | Docker | AWS | GTM

### Design & Illustrations

Photoshop | Illustrator | Figma

### Management

Scrum | Agile | Jira | Linear

## Language

French - Native

English - C2

Spanish - C1

Portuguese - B2

Dutch - B2

## A life of work

### 2023 - Today

#### Fullstack developer @ Majelan ETX

Front-end Developer at Majelan ETX, spearheading platform development for the Majelan podcast app. Collaborating closely with cross-functional teams to architect and implement robust solutions. Utilizing Next.js and React to engineer intuitive and high-performance user interfaces. Contributing expertise in front-end development methodologies to drive project success. Ensuring adherence to best practices in coding standards, performance, and scalability.

Excited to be part of a dynamic team driving innovation in the podcasting industry.

### 2021 - 2023

#### Product developer @ SweetPotato

Focusing on personal ventures while travelling around the world, I have built two different hybrid apps from scratch. One aim to facilitate funds collect for charities. The other one helps guest management for camps.

### 2019 - 2021

#### Product Owner @ Beelance

Successfully assumed the role of Product Owner for the team over the past year, driving product vision and strategy. Leveraged strong technical skills to improve communication and alignment between stakeholders and the product team. Introduced and integrated Behavior Driven Development (BDD) into product backlog items, streamlining the development and testing processes.

### 2018 - 2019

#### Software Engineer @ Beelance

Beelance.io is a web platform that offers services for freelancers. It is built with React in the frontend and Node.js in the backend. It uses GraphQL as a query language and hold its data in a graph database. As a software engineer, I have contributed to the technical decisions and implementations.

After two years, I endorsed the role of product owner with a goal to focus more on the product from a business perspective. I have learned a lot and enjoyed facing new challenges.

### 2012 - 2014

#### Software Engineer @ IgnitionOne

Beelance.io is a web platform that offers services for freelancers. It is built with React in the frontend and Node.js in the backend. It uses GraphQL as a query language and hold its data in a graph database. As a software engineer, I have contributed to the technical decisions and implementations.

After two years, I endorsed the role of product owner with a goal to focus more on the product from a business perspective. I have learned a lot and enjoyed facing new challenges.
