Expertise

Languages & Frameworks

TypeScript | React | Next.js | Ionic
Firebase | Tailwind | MUI | Node.js
GraphQL | Neo4J | Docker
Python | Claude | MCP
Scala | PostgreSQL | DevOps
A ridiculous amount of npm packages

Dev & Analytics

Git | Docker | AWS | GTM

Design & Illustrations

Photoshop | Illustrator | Figma

Management

Scrum | Agile | Jira | Linear

Language

French - Native
English - C2
Spanish - C1
Portuguese - B2
Dutch - B2

Nicolas Sandron

Product Engineer

Product Engineer with 18 years of experience shipping web and mobile applications. I work hand in hand with clients and users, translating their goals into products that deliver. I orchestrate AI across the entire development lifecycle — tools, skills, and pipelines — to deliver quickly and consistently.

I own the technical direction from architecture to production. Scalability, stability, and clean, maintainable code are the foundation of everything I build — never an afterthought.

Let's connect to see how my expertise can help you reach your goals.

A life of work

December 2024 - Present

Lead Product Engineer @Flowie

- Product Engineering: Translate client and user needs into shipped features, owning each one from problem to production.
- AI-Orchestrated Delivery: Architect the AI tools, skills, and pipelines that let a lean team deliver with the speed and consistency of a much larger one.
- Technical Direction: Own architecture, scalability, and stability across the platform, keeping the codebase clean and built to grow.
- Process Engineering: Streamline the development pipeline so the team's energy goes into product value, not repetitive work.
- Technical Leadership: Drive decisions on stack and tooling, and raise the bar for the whole team.

Claude · MCP · TypeScript · React · Node.js · Python · Scala · PostgreSQL · Figma · Material UI · Docker · Linear

November 2023 - December 2024

Fullstack Developer @Majelan X

- Leading platform development for the Majelan podcast app.
- Collaborating with cross-functional teams to architect and implement robust solutions.
- Engineering intuitive and high-performance user interfaces using Next.js and React.
- Driving project success with expertise in front-end development methodologies.
- Ensuring adherence to best practices in coding standards, performance, and scalability.

Next.js · React · Firebase · Go · Figma · Docker · Playwright

November 2021 - November 2023

Product Developer @SweetPotato

- Built two hybrid apps from scratch: one for facilitating fund collection for charities, and another for guest management at camps.
- Focused on personal ventures and innovative solutions.

Ionic · React · Firebase · Node.js · Python · Docker · GraphQL · Cypress

2018 - 2021

Software Engineer / Product Owner @Bealance

- Led the team in an Agile environment using Scrum methodologies.
- Contributed to technical decisions and implementations for a web platform serving freelancers.
- Utilized React for frontend, Node.js for backend, and GraphQL for data queries.
- Transitioned to a Product Owner role to focus on the product from a business perspective.

React · Node.js · Python · GraphQL · Docker · Neo4j · GitLab · Jest · Cypress

2014 - 2018

Software Engineer @IgnitionOne

- Developed an internal tool to automate the creation and optimization of pop-ups.
- Migrated the platform from AngularJs and Node.js to React and Java.
- Focused on frontend challenges in a fullstack role within an Agile team.

AngularJs · React · Node.js · MongoDB · GitLab · Jest
